PROFILE

I'm a Full Stack Developer with experience of one year plus in developing SaaS products using MERN stack technologies, I am skilled in developing and implementing high-quality features. I have a strong command over React.js and extensive knowledge of API integration.

EXPERIENCE

Ovonts Technologies Pvt. Ltd.   MAR'22 - MAY'23

- Part of the SAAS product development team and played a key role in developing multiple features that improved the overall user experience.
- Designed and implemented user authentication and authorization using technologies such as JWT and OAuth 2.0. Developed many multi-step forms as well as landing page using React and Redux, which resulted in a more efficient and streamlined user experience.
- Worked extensively with Node.js and utilized it to create APIs for authentications, CRUD operations and integrated many third-parties API with frontend of the product.
- Collaborated with cross-functional teams to troubleshoot and resolve complex technical issues.
- Kept up-to-date with emerging trends and technologies in the industry and shared knowledge with the team to ensure continuous learning and improvement.

PROJECTS

SAAS AI PLATFORM

A state-of-the-art AI SaaS Platform with five AI tools using models like OpenAI and ReplicateAI. Powered by the Next.js 13 App Router, our platform will not only be efficient but also user-centric.

- Nextjs, Typescript, OpenAI Api, Clerk

ECOMMERCE ADMIN

Secured E-commerce admin dashboard serve as both CMS, admin and API where admin can create, update and delete categories as well as products and upload multiple images for products. Also used clerk for authentication

- Nextjs, Typescript, Shadcn, Clerk

ECOMMERCE STORE

Build a fully functional e-commerce with with admin dashboard with seamless navigation and user experience and also integrated stripe as payment gateway

- Nextjs, Typescript, mongodb, NextAuth
